

FWT Dashboard User Manual

Hello and welcome to the FWT Dashboard – the ultimate tool for commentators!

Here you'll find everything you need to deliver professional and engaging commentary for FWT events.

The dashboard provides all the information about the athletes participating in each event, neatly sorted by start list. You can explore all results, view the performance history of riders over the years, and access event history to see how athletes performed at the same venue in the past. You also get an overview of the FWT Series Rankings – all in one place.

Additionally, you can store individual notes and information about riders, and even share them with your colleagues through the Friends system.

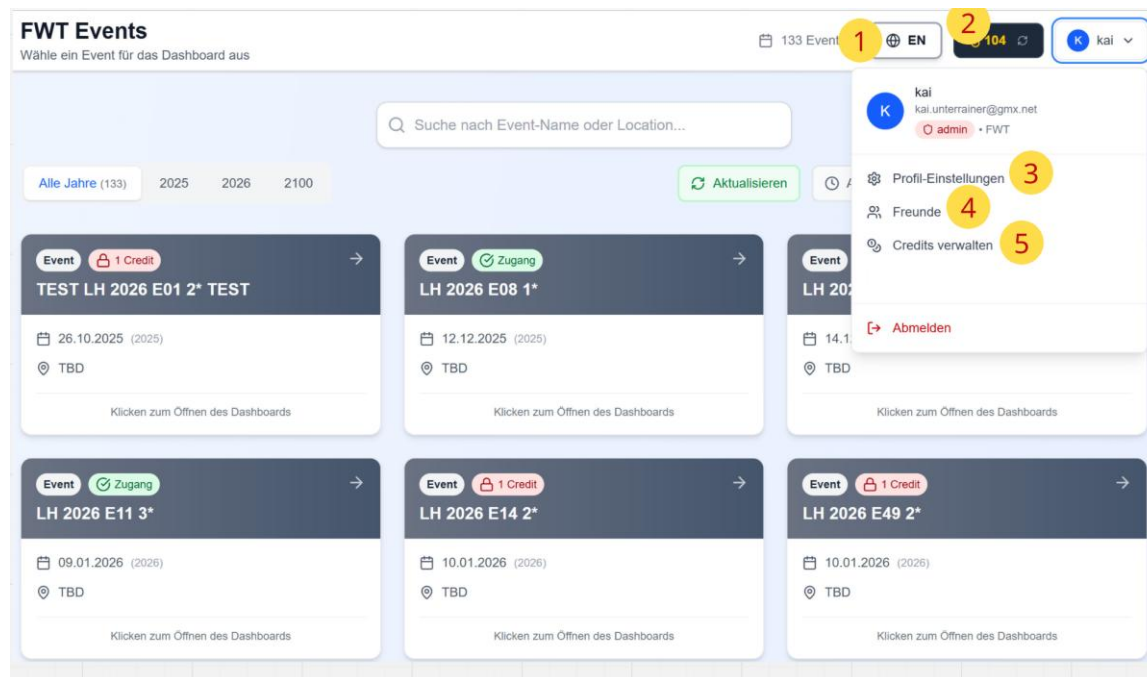

Every new user starts with 5 credits. If you need more, simply reach out to kai@open-faces.com. To get familiar with the tool, you can also explore past events – they are free to view, so you can try out all features with full data.

Enjoy using the dashboard, and I'd love to hear your feedback!
Together, we can continue improving this tool for everyone.

The Basics

1. Languages

On the start page, you can adjust the interface language to your needs. Supported languages are German, English, and French.

2. Credits

Every new user automatically receives 5 credits to start with. You need these credits to unlock events. If you require more credits, simply contact kai@open-faces.com.

3. Profile Settings

In your user settings, you can edit your personal information such as password, username, and organization.

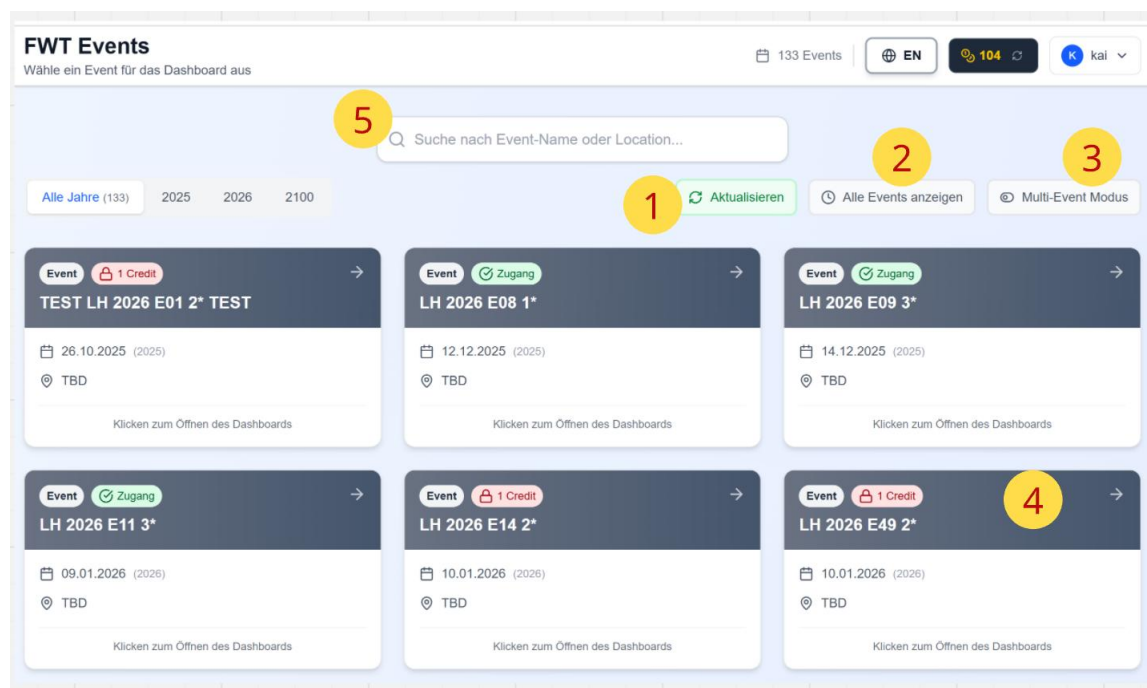

4. Friends

The Friends feature allows you to connect with colleagues and share commentator information. To add a colleague, you need their exact username. Enter it and send a request — once accepted, you can exchange information.

5. Managing Credits

Credit management serves as a safeguard to prevent unlimited event downloads. If you need additional credits for your work, please contact kai@open-faces.com.

The Event Section

1. Refresh

The Refresh button lets you reload event data if needed. In practice, this feature is rarely necessary, as updates usually occur automatically.

2. Show All Events

This option displays past events that you can view for free. This is especially useful when there are no active live events, allowing you to explore all features and get familiar with the system.

3. Multi-Event Mode

The Multi-Event Mode is designed for cases where two events take place simultaneously at the same venue — for example, when Junior and Qualifier runs are held in parallel with alternating bib numbers. Both events are shown side by side and sorted by bib number. Make sure the bib numbers are correctly configured in Liveheats.

4. Select Event

To access an event, simply click on its event card. This consumes one credit, but once unlocked, the event remains permanently available to you. You can revisit it anytime without using more credits.

5. Search Field

The search bar allows you to quickly find events by name or location.
